**DevOps:** AWS · Docker · Git · Linux · Python (scripting)

## WORK EXPERIENCE

---

### ALLEGRO Sp. z o.o.

Warsaw, Poland

Front-end Software Engineer

Aug 2024 – Present

- Improved build tools for the company-wide microfrontend platform by contributing, significantly reducing build time and bundle size to enhance developer efficiency and application performance.
- Coordinated work and deployments with multiple teams across the company, ensuring seamless integration and timely delivery of features.
- Led the team's frontend development efforts, enforcing high standards for code quality in Preact and frontend architecture for maintainability.
- Created frontends and launched on time multiple Proof of Concept (PoC) and Minimum Viable Product (MVP) projects, driving innovation through rapid prototyping and iterative development.
- Maintained and refactored merchant frontend components, optimizing performance to deliver a faster and more responsive user experience.
- Contributed to and created multiple components reused across 1200+ microfrontends in the company.

### WATAHA GROUP (self-employed, agency)

Warsaw, Poland

Team Lead Engineer

Dec 2023 – Aug 2024

- Designed and developed multiple SPA websites using Next.js, Tailwind, and PostgreSQL.
- Improved UX and accessibility by developing with a11y best practices and implementing dynamic GSAP animations on the frontend, following thorough client consultations to identify and meet their needs.

### LLINFORMATICS (software-house)

Warsaw, Poland

Fullstack Software Engineer

Jul 2021 – Dec 2023

- Led the entire feature creation process from collecting business requirements, system design, consulting, development, to testing, ensuring seamless project delivery.
- Successfully developed proof-of-concept projects in early phases, showcasing innovative technologies including blockchain.
- Maintained projects built with Elixir, Phoenix, LiveView, PostgreSQL or MongoDB and React.js.
- Mentored a Junior Frontend Developer, creating comprehensive onboarding and learning materials to improve efficiency and consistency across the company.
- Achieved a significant reduction in API response time and bandwidth usage by implementing a caching system using Redis for a translation management project.

## OPEN SOURCE

---

**react-leaf-polls library** - <https://github.com/salalo/react-leaf-polls>

Nov 2022

- Set of multiple reusable and customizable poll components for React.

## EDUCATION

---

### WIT (Warsaw School of Information Technology)

Warsaw, Poland

Bachelor of Engineering IT Management Techniques - specialty in Computer Science

2020-2024

Thesis: Crowdfunding Platform Using Blockchain Technology.
